Outline

- Earthquake disaster in Indonesia
- Earthquake sources : slip-rate and maximum magnitude
- PSHA map of Indonesia
- Earthquake risk analysis
- Building code
- Conclusion

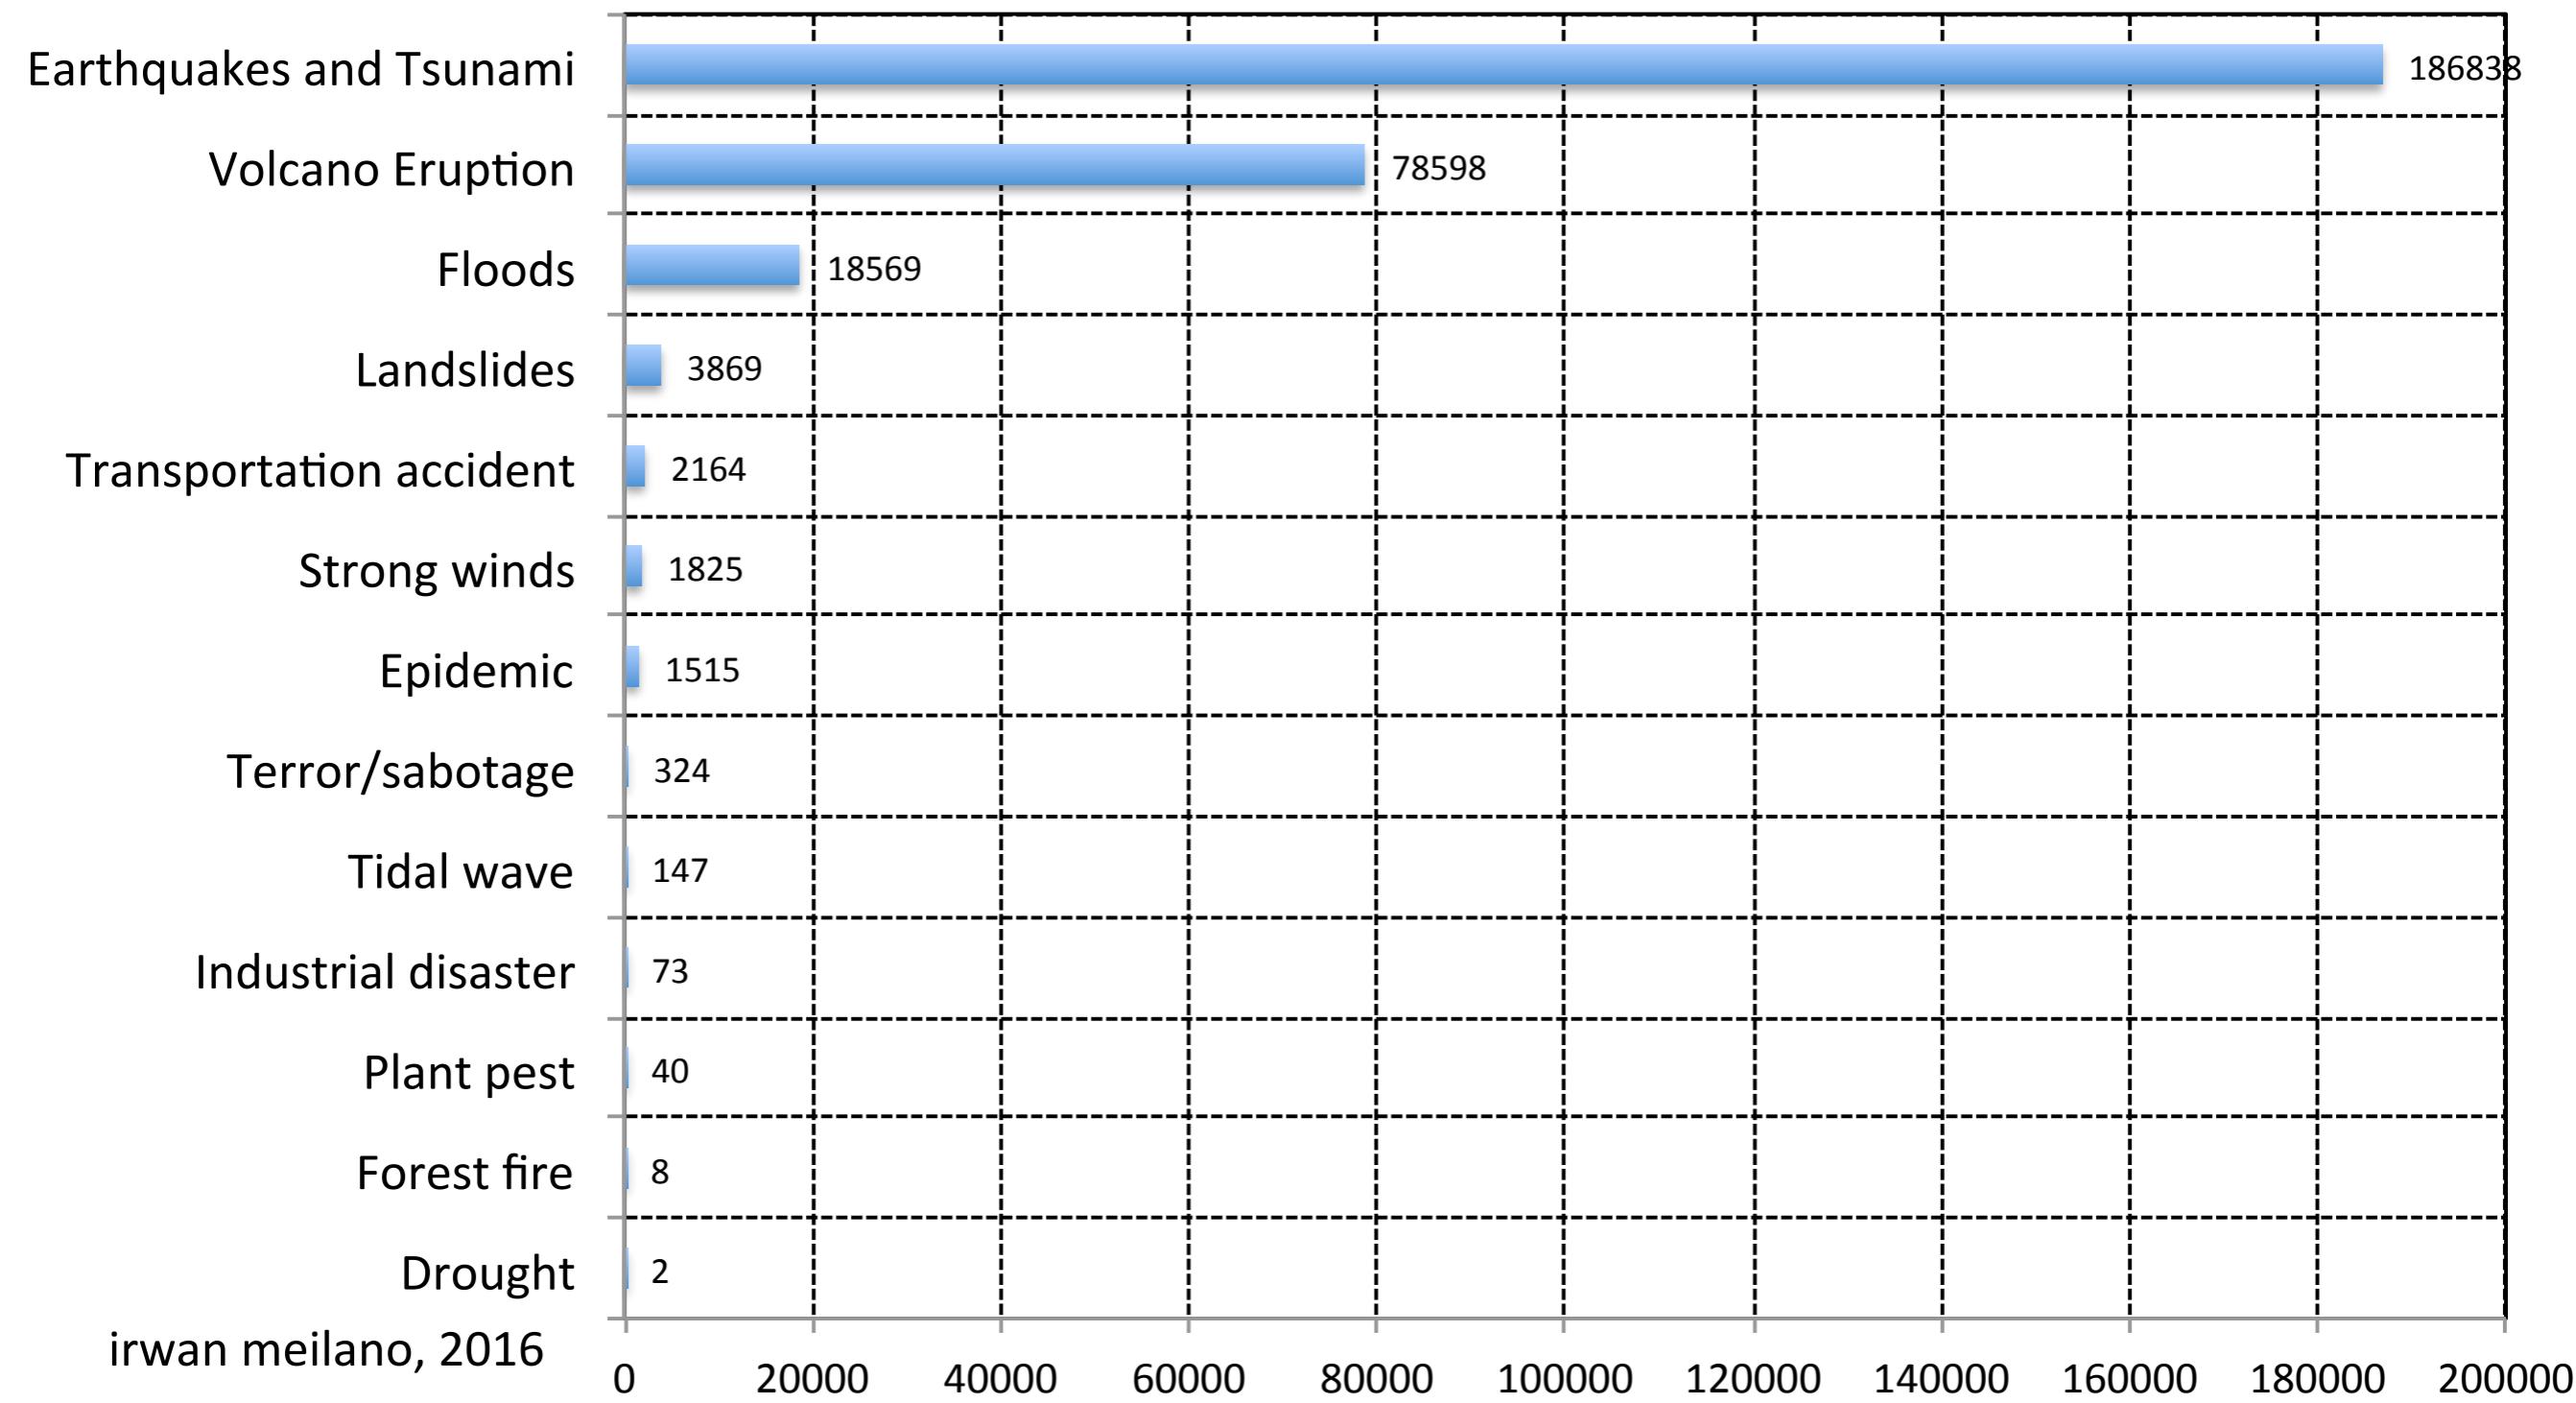

Number of disasters in Indonesia (50years)

irwan meilano, 2016

Data source : DIBI, 2016

Number of disasters victims in Indonesia (50years)

irwan meilano, 2016

Data source : DIBI, 2016

The 2004 Earthquake

Jalan Sri Ratu Sufiatuddin, Banda Aceh.

Bawah Jembatan Pante Pirak, Banda Aceh.

Lack of knowledge

Lack of earthquake infrastructure

Lack of Mitigation

Lack of Research

SERAMBI INDONESIA/BEDU SAINI

Jalan Teuku Panglima Polem, Banda Aceh.

SERAMBI INDONESIA/BEDU SAINI

Silent tsunami: no tsunami warning for Acehnese. In fact, when tsunami happened, many people still didn't understand what was going on..

2004 Earthquake-tsunami (Media)

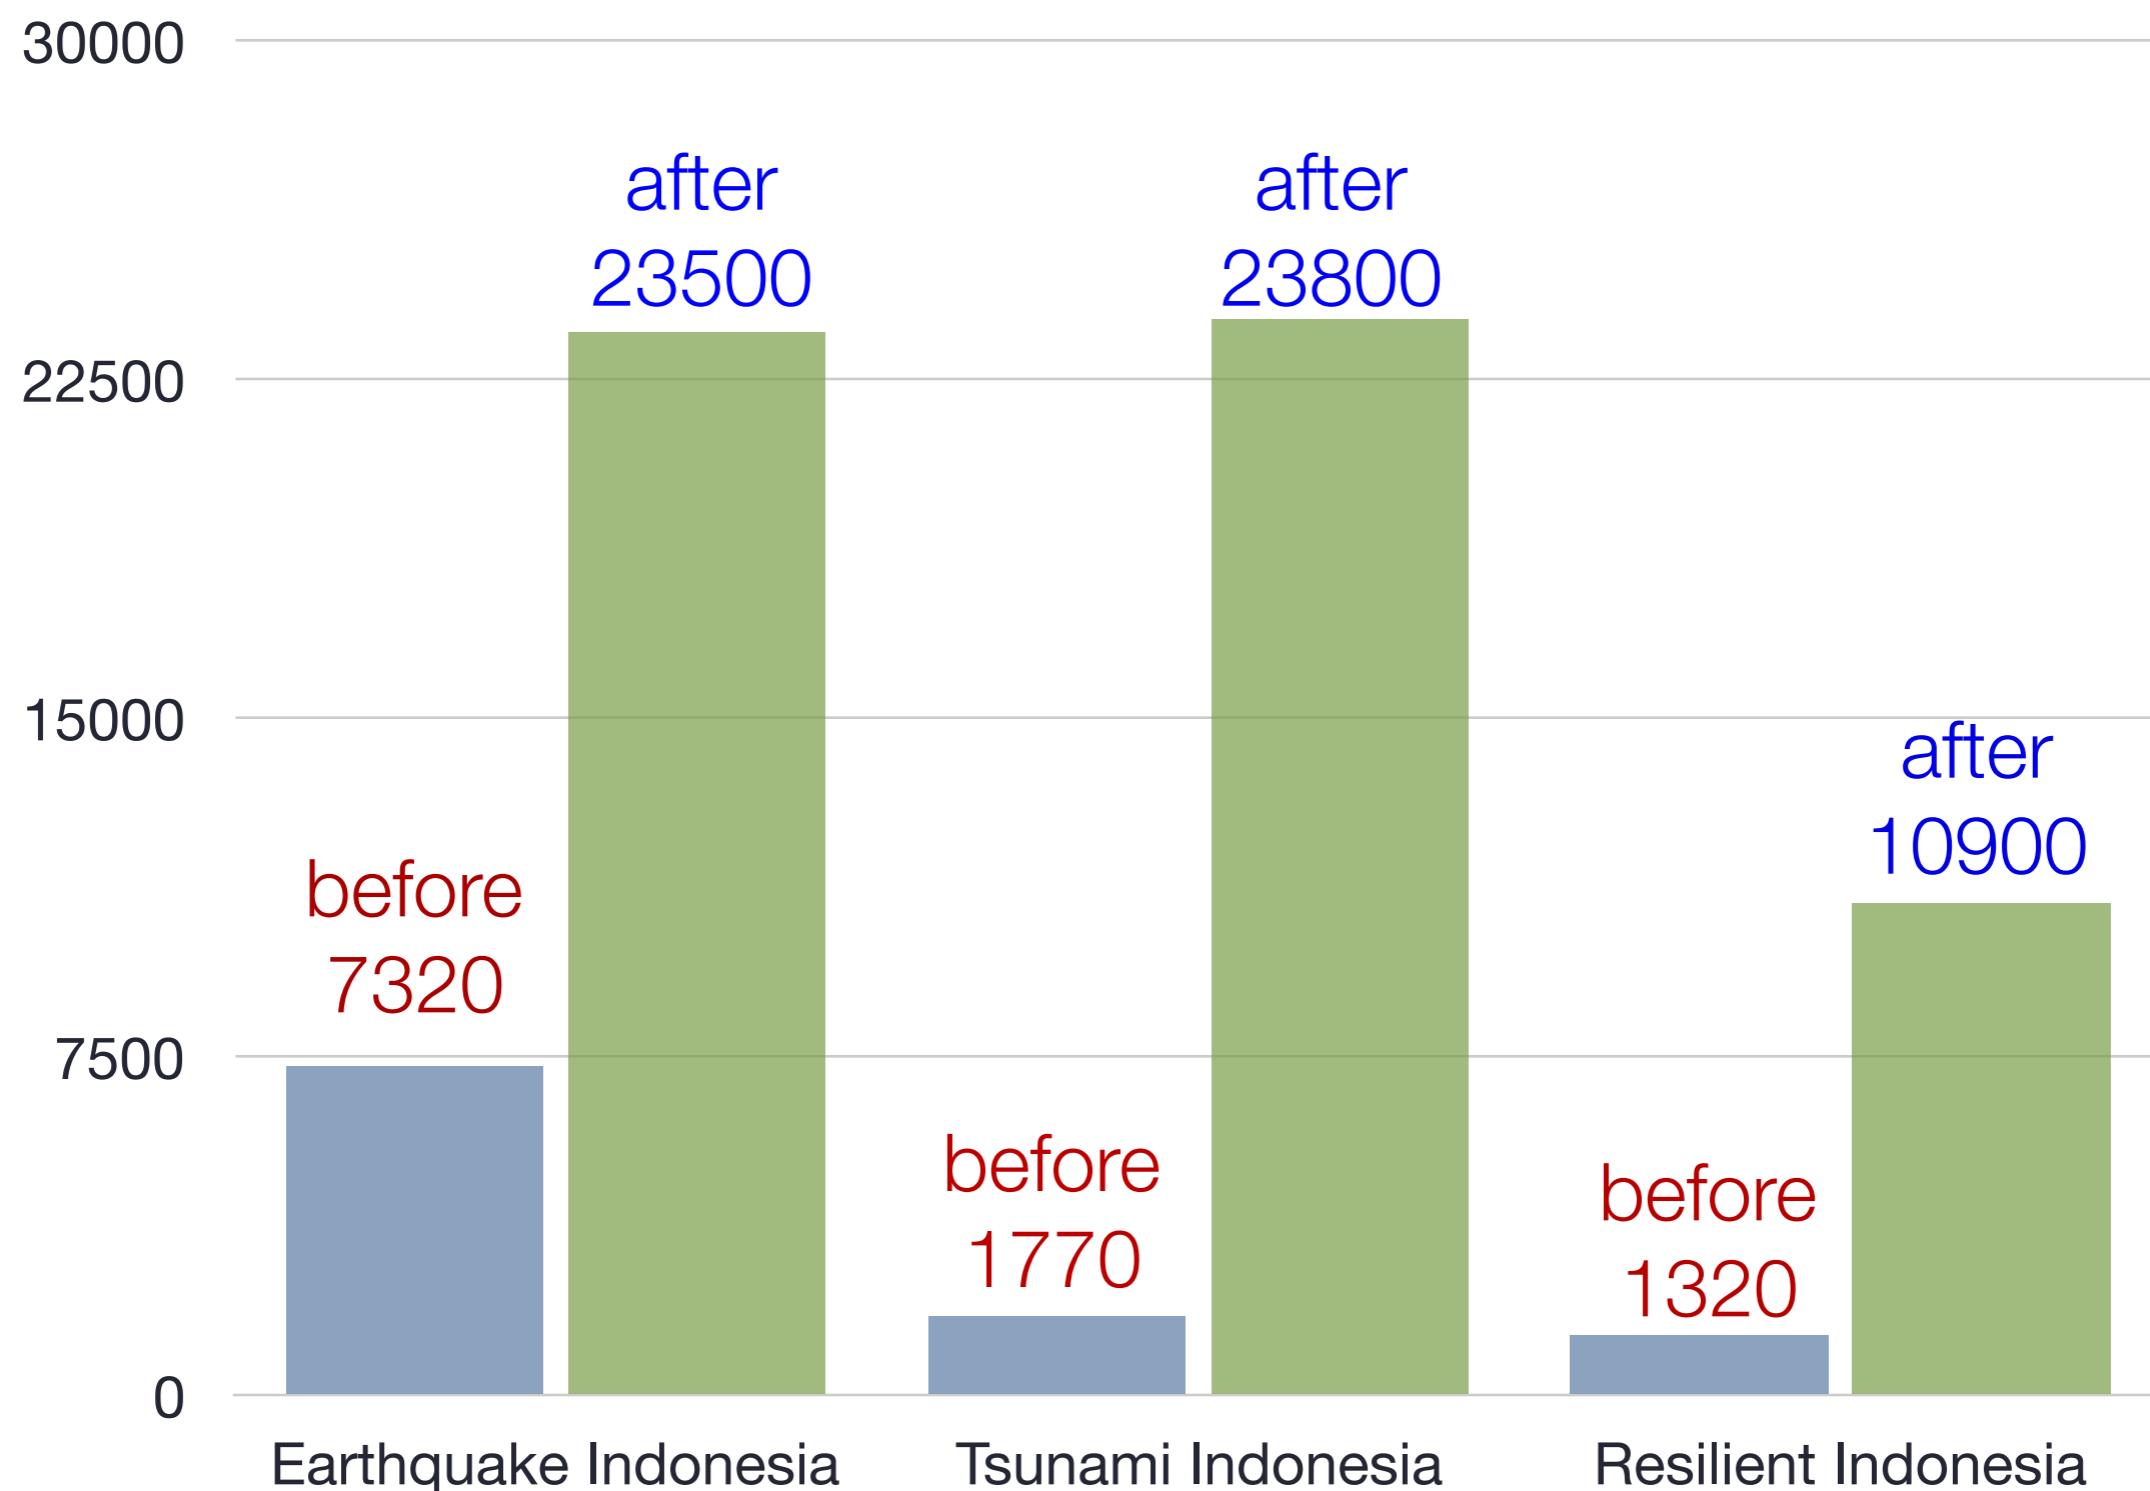

None of the media in Indonesia, including *Kompas*, had warned of tsunami Aceh.

From 26 December 2002 to 25 December 2004, the word ‘tsunami’ only found in 39 article in *Kompas*.

There was no article in *Kompas* had connected keyword “tsunami” with “Aceh.”
